## 1.0 Executive Summary

- 1.1 This statement sets out Shropshire Council's assessment of the housing land supply position in **Shropshire** as at 1<sup>st</sup> April 2013. The five years covered by the assessment extend to 30<sup>th</sup> March 2018, namely the years between 2013/14 and 2017/18. The statement will be updated at least annually as further information becomes available regarding timescales for the deliverability of housing sites.
- 1.2 Shropshire currently has 4.95 years' supply of deliverable housing land as shown below.

### Five Year Supply of Housing Land for Shropshire at 1<sup>st</sup> April 2013

A	Total Deliverable Housing Land Supply - see table 3	9710
B	Five Year Housing Requirement (2013-2018) - see table 2	9,804
C	Surplus/Deficit in requirement (A - B)	-94 (99 %)
D	Number of Years' Supply	4.95 years

- 1.3 As the Core Strategy specifies a figure for the town of Shrewsbury, the supply position for **Shrewsbury** is detailed in section 5. Shrewsbury currently has 5.28 years' supply of deliverable housing land as shown below.

### 5 Year Supply of Housing Land for Shrewsbury at 1<sup>st</sup> April 2013

A	Total Deliverable Housing Land Supply - see table 6	2,596
B	Five Year Housing Requirement (2013-2018) - see table 7	2,457
C	Surplus/Deficit in requirement (A - B)	+139 (106%)
D	Number of Years' Supply	5.28 years

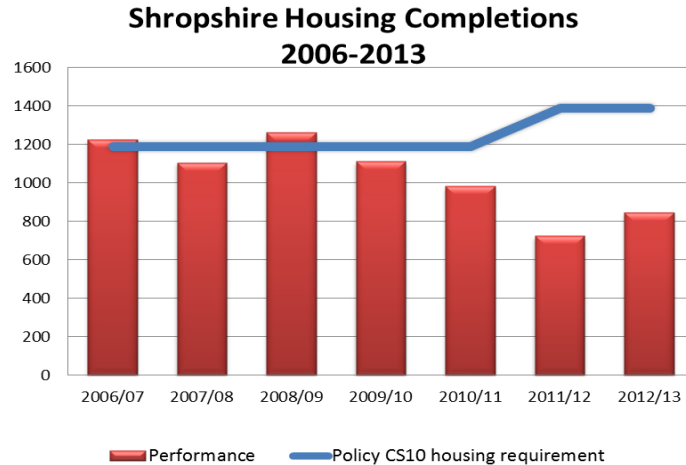

- 1.4 The next update to Shropshire's housing land supply position is expected in December 2013.

## 2.0 Housing Land Requirements

- 2.1 The Shropshire Core Strategy, adopted March 2011, set the context for the five year housing land supply position. The housing target for Shropshire as set out in Policy CS1 is 27,500 dwellings which are to be provided over the period 2006 to 2026.
- 2.2 Policy CS10 of the Core Strategy sets out the mechanism for the release of sites so that a five year supply of housing land will be maintained over the plan period. This includes phasing measures based on the expected housing trajectory and reflecting timing constraints due to the need for infrastructure to be put in place.
- 2.3 The NPPF published in March 2012 requires that Local Authorities provide five years' supply of housing with an additional buffer of 5% moved forward from later in the plan period to ensure choice and competition in the market for land (or 20% where there has been a persistent record of under delivery). The phasing time bands set out under Policy CS10 have been used to measure past delivery performance, see Table 1 below.

**Table 1: Shropshire Housing Completions, 2006/07 to 2012/13**

	<b>Shropshire</b>			
	<b>Net Completions</b>	<b>Core Strategy Policy CS10: Phasing Time Bands</b>	<b>Over provision/ shortfall</b>	<b>Cumulative provision/ Shortfall 2006 to date</b>
2006//07	1228	1190	+38	38
2007/08	1106	1190	-84	-46
2008/09	1265	1190	+75	29
2009/10	1112	1190	-78	-49
2010/11	984	1190	-206	-255
2011/12	724	1390	-666	-921
2012/13	847	1390	-543	-1464

- 2.4 In five of the seven years of the plan period so far (2006-2013), Shropshire's completions have been below the Core Strategy target figure and therefore an additional buffer of 20% is to be added to the requirement in accordance with the NPPF.
- 2.5 Over the next five years (2013-2018) Policy CS10 shows a requirement for 1,390 dwellings to be provided per annum giving a total of 6,950 dwellings, as shown in table 2 below. To this is added the 20% buffer (equivalent to a sixth year of supply) as required by the NPPF. Having regard to the 'Sedgefield' approach, there is also a need to provide for the delivery shortfall of 1,464 dwellings from the start of the Core Strategy plan period (2006) in the five year period. The total housing requirement for the next five year period is therefore 9,804 dwellings.

**Table 2: Calculation of the Five Year Requirement for Shropshire**

Five Year Housing Supply Target for Shropshire 2013-2018		Net Dwellings
A	Housing Requirement 2013-2018	6,950
B	Plus 20% buffer	1,390
C	Delivery Shortfall 2006-2013	1,464
D	Requirement including shortfall	9,804

Note: If additional national guidance is provided on the methodology, these figures will be amended as required.

### 3.0 Approach to Supply

#### *NPPF definition of a 'deliverable' site*

- 3.1 Paragraph 47 of the National Planning Policy Framework (NPPF) requires that sites in the five year supply be 'deliverable'. This is defined in footnote 11 as, "sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that the site is viable."
- 3.2 Sites with potential to be included in the five year supply have been assessed against these NPPF criteria. In making this assessment, the following assumptions have been made:
- 3.3 For sites to be considered **available now** they will:
- Be under construction; or
  - Have recent planning permission; or
  - Have recently been promoted to Shropshire Council as available for development;  
*and*
  - Have no known land ownership or legal constraints
- 3.4 For sites to be considered **suitable now** they will:
- have received planning consent or a resolution to grant consent; or
  - been identified in an adopted Local Plan or in the Core Strategy; or
  - be in a location that is considered to accord with the NPPF's 'presumption in favour of sustainable development'
- 3.5 For sites to be considered **achievable** they must have a realistic prospect of delivery within five years and will:
- Be under construction; or
  - Have no known ownership constraints; and
  - Have no known physical or other constraints; and
  - Have no viability constraints; and
  - Have no conditions or S106 agreements precluding or limiting development within the 5 year period.

#### *Draft National Planning Practice Guidance*

- 3.6 At the end of August 2013, draft National Planning Practice Guidance was published which included:

"Deliverable sites for housing include those that are allocated for housing in a development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that

schemes will not be implemented within five years or where planning permission has expired.

However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgements on deliverability are clearly and transparently set out. If there are no significant constraints (e.g. infrastructure) to overcome, sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe.”

### *Categories of Deliverable Sites in Shropshire*

3.7 Each site has been put into one of the categories below, ensuring no duplication. Sites that fit into more than one category have generally been placed in the category highest on the table: for example an allocated site with planning permission is categorised as a site with planning permission (category A). The categories used are:

- A. Dwellings on sites with Planning Permission at 1<sup>st</sup> April 2013
- B. Sites allocated in an adopted Local Plan & expected to be delivered within 5 years
- C. Sites on adopted sustainable urban extensions (SUEs) estimated to be completed within 5 years
- D. SHLAA sites deliverable within 5 years
- E. Selected SAMDev Site Allocations likely to be delivered within 5 years
- F. Emerging Affordable Housing Sites
- G. Windfall sites on previously developed land (excluding gardens) of less than 5 dwellings expected to be delivered in years 4 & 5 only

### *Build rate assumptions*

3.8 The build rate assumptions for Shropshire are as follows:

North Shropshire	21 dwellings/year
Central Shropshire	38 dwellings/year
South Shropshire	36 dwellings/year

3.9 These figure are based both on feedback from the Shropshire Developer Panel that build rates in Shropshire are around 30-40 units/year, and on an analysis of large housing sites (Schedule H). The analysis shows that large sites in Shropshire often exceed 40 units/year, although the statistical average is 37 units/year. It is the experience of many local developers that, “the right site sells well” in Shropshire. It is considered

that these build rates represent a fair and reasonable reflection of the local market.

*A. Sites with planning permission*

3.10 Paragraph 47 (footnote 11) of the NPPF specifically states, “Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.” On this basis, Schedule A lists all sites with planning permission at 1<sup>st</sup> April 2013, excluding only those sites for which there is specific reason to exclude them.

3.11 In the vast majority of cases where construction has commenced, it is expected that sites will be delivered within the five year timescale. An annual appraisal is undertaken to assess whether sites are deliverable within the five year time period. In some cases, where development of sites is expected to take more than five years to complete, only part of the site is included within the five year supply pool. Account is also taken of dwellings recorded as completed at the base date and residential units that are lost through any development scheme to produce a net figure.

*B. Sites allocated in an adopted Local Plan*

3.12 Sites that are allocated in the adopted Local Plans of the former five District & Borough Councils in Shropshire have already been assessed and considered suitable for development. The deliverability of allocated sites has been carefully considered, and only the number of dwellings considered likely to be delivered within five years has been included (Schedule B).

*C. Sustainable Urban Extensions (SUEs)*

3.13 Sustainable Urban Extensions are identified in Shrewsbury and Oswestry in the Shropshire Core Strategy policies CS2 and CS3 respectively. Negotiations are progressing on the development of all three sites and the latest information has been drawn upon to assess the number of dwellings on each of the SUEs which are expected to be delivered within the five year period up to March 2018 (Schedule C).

*D. Strategic Housing Land Availability Assessment (SHLAA) sites*

3.14 Windfall development on unallocated sites within the development boundary forms a significant proportion of all development that takes place in Shropshire, amounting to between 65% and 80% of all development that has taken place over the first five years of the Core

Strategy plan period<sup>1</sup>. The SHLAA identifies a large number of such sites as suitable for development. It is therefore considered reasonable to include, within the five year supply pool, those sites identified in the SHLAA which have been assessed as being expected to be developed within five years.

- 3.15 The SHLAA process included an assessment of the suitability of potential sites identified, through the analysis of issues such as policy constraints, planning history, landscape impact, infrastructure provision, contamination and flood risk. Only 'accepted' sites (i.e. considered suitable) have been included in the five year supply.
- 3.16 The SHLAA database has been updated every year, as an active database to which new sites are continually added. Schedule D includes those SHLAA sites from the current active SHLAA database that are considered highly likely to be delivered within the next five years. Many SHLAA sites that were identified in the 2009 SHLAA report have since obtained planning permission or been completed, and are consequently no longer included. A new SHLAA report is due to be published to accompany the SAMDev Final Plan. It should be stressed, of course, that inclusion of a SHLAA site in the Five Years Supply is without prejudice to the determination of any planning application for that site.

#### *E. Site Allocations & Management of Development (SAMDev) sites*

- 3.17 Unlike many other local authorities, Shropshire has an up-to-date Core Strategy (adopted March 2011). Furthermore, the Core Strategy seeks to fully accommodate the objectively assessed housing need for 27,500 new homes over the 20 years 2006-2026. This exceeds the housing requirement that was proposed in the West Midlands Regional Spatial Strategy Phase 2 Revision of 25,700 homes and accords with the Panel Report (September 2009) which recommended an increase for Shropshire to 27,500 for the period 2006-2026.
- 3.18 The Shropshire Core Strategy positively plans for this new housing, with a high level policy and indicative housing requirements for each of Shropshire's 18 market towns (policies CS2 and CS3) and a positive approach to development in rural villages (policy CS4). The Core Strategy and accompanying LDF Implementation Plan with its 18 Place Plan appendices puts a strong emphasis on localism and on fully engaging with local communities in planning for delivery.
- 3.19 Shropshire Council was at the forefront of producing the Marches Local Enterprise Partnership's (LEP) High Level Planning and Housing Statement "Poised for Growth"<sup>2</sup>. As this document makes clear, Shropshire Council is proactively committed to housing delivery, and is

working with the development industry and local communities to ensure that obstacles to development are removed. The Council's Housing Implementation Strategy details the Council's proactive approach to ensuring delivery.

3.20 The Shropshire Site Allocations and Management of Development (SAMDev) Plan complements the Core Strategy by identifying the sites that will meet the agreed Core Strategy vision and housing requirements. Work commenced on the SAMDev Plan in 2009, with an Issues & Options consultation April-June 2010. Preferred Options for the SAMDev Plan were published in March 2012, with consultation until July 2012. Revised Preferred Options for the SAMDev Plan were published in June 2013 for consultation until August 2013, and a Final Plan is expected for publication in January 2014 leading to submission for examination in spring 2014. The SAMDev Plan is at an advanced stage, having undergone three stages of public consultation, and most importantly exists in the context of a recently adopted Core Strategy and a positive approach towards delivery.

3.21 Some sites that are preferred options for allocation in the SAMDev Plan are included in the Five Year Supply depending on the degree to which they meet the criteria given in paragraph 216 of the NPPF:

*“decision-takers may also give weight to relevant policies in emerging plans according to:*

- The stage of preparation of the emerging plan (the more advanced the preparation, the greater the weight that may be given);*
- The extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and*
- The degree of consistency of the relevant policies in the emerging plan to the policies in this Framework (the closer the policies in the emerging plan to the policies in the Framework, the greater the weight that may be given).*

3.22 The Planning Minister, Nick Boles, has recently confirmed that emerging plans may be afforded some weight (Hansard 17<sup>th</sup> July, 2013), stating that, “We will make it clear that once a plan has reached the point that, first, it has become specific and, secondly, it has gone through a fairly substantial level of public consultation, it will become something of real materiality – to use the lawyers’ phrase – as a consideration in decision making.” It is Shropshire Council’s view that the SAMDev Plan has reached this point, being settlement and site specific and having undergone very substantial public consultation, namely three months of Issues & Options consultation in spring 2010, over four months of Preferred Options consultation in spring 2012, and eight weeks of Revised Preferred Options consultation in July/August 2013.

3.23 In assessing preferred options for allocation in the SAMDev Plan against the NPPF's criteria and the draft National Planning Practice Guidance above, we have given particular consideration to:

- The retention of the site as a preferred option for the SAMDev Plan following the process from the start of SAMDev Plan consultation in 2010 to date. This process has included the lengthy 2012 consultation and the subsequent consideration of issues raised and decisions by Cabinet on 26<sup>th</sup> June 2013 regarding proposed changes in the 2013 SAMDev Revised Preferred Options;
- the types of objections received and whether they relate to material planning considerations or not;
- whether planning issues raised in objections can be shown to be satisfactorily addressed;
- the degree of support of the relevant Town or Parish Council for the site;
- the sustainability of the site measured against the NPPF;
- whether there are any unresolved issues or significant constraints relating to site delivery, such as infrastructure, access, landownership, etc.

3.24 The Council has taken a cautious approach to the inclusion of SAMDev Plan preferred option sites. Sites undergoing consultation in July/August 2013 are not included, unless the consultation relates to amendments to sites already consulted upon as preferred options, and sites with significant unresolved issues are not included. Only 46% of SAMDev Plan sites are included in Schedule E of this Five Year Housing Land Supply Statement at this point in time, and only the number of homes that are considered deliverable within five years are counted, which in many cases is less than the site's full capacity. Many of the sites listed are under active discussion or at formal pre-application stage. It should be stressed, of course, that inclusion of a preferred option site in the Five Years Supply is without prejudice to the SAMDev Plan process or the determination of any planning application for that site.

3.25 In conclusion, Shropshire's cautious and carefully considered approach to including some of its emerging site allocations in the Five Year Supply is consistent with the NPPF, draft National Planning Practice Guidance and ministerial statements. It is taken in the context of the Council's positive approach to housing delivery, evidenced by its recently adopted Core Strategy containing a very positive approach to sustainable development, its LEP "Poised for Growth" planning and housing statement, and proactive approach to delivery as outlined in its Housing Implementation Strategy.

#### *F. Emerging Affordable Housing Sites*

3.26 Shropshire Council's planning policies CS5 and CS11 and accompanying Type and Affordability of Housing Supplementary

Planning Document (SPD) support the provision of affordable housing on sites outside settlement development boundaries and in rural hamlets as an exception to normal planning policies. Furthermore, the Council has consistently enabled such exception sites to come forward over the years, with great success, particularly through its flagship “build your own affordable home” scheme. Such sites are generally on greenfield sites that are neither counted in the “windfall” category, nor do they necessarily appear in the SHLAA which relates to only certain settlements. As they form an important part of the housing supply in Shropshire, it is reasonable to allow for their contribution. Schedule F therefore details a supply of specific deliverable exception sites that have a reasonable expectation of delivery within five years.

*G. Windfall sites on previously developed land*

- 3.27 A modest windfall allowance on dwellings which are likely to come forward on sites of less than five dwellings is also made for years four and five of the five year period (2016/17 and 2017/18), assuming that any windfall for the first three years will already be ‘in the system’. The allowance is based on the assumptions made in the Shropshire SHLAA 2009 (para. 8.2.5), which assumed that 254 dwellings per annum would be built on small previously developed sites of less than 5 dwellings within the settlements identified in SHLAA. An average of 65 dwellings per annum on garden land would have originally been included in the SHLAA figure. As garden land no longer falls within the definition of previously developed land, this has been excluded, giving an annual figure of 189 dwellings. This amounts to 378 dwellings over the 2 years 2016/17 and 2017/18. No allowance has been made for small windfall development outside the SHLAA settlements or on greenfield sites, although in reality development is likely to come from these sources as well.

## 4.0 Housing Land Supply for Shropshire

4.1 Table 3 sets out the housing land supply position as at 1<sup>st</sup> April 2013:

**Table 3: Summary of Deliverable Housing Land Supply in Shropshire – 1<sup>st</sup> April 2013**

		Net Dwellings

D	SHLAA sites deliverable within 5 years	601
E	Selected SAMDev Site Allocations likely to be delivered within 5 years	2,576
F	Emerging Affordable Housing Sites	83
G	Windfall sites on previously developed land (excluding gardens) of less than 5 dwellings expected to be delivered in years 4 & 5 only	378
	<b>Total Deliverable Sites at 1<sup>st</sup> April 2013</b>	<b>9710</b>

4.2 The sites which make up these various components are listed in schedules which are appended to this statement.

### *Housing Land Supply in Shropshire*

4.3 Table 4 brings together the information in Tables 2 and 3, setting out the housing requirement for the 5 year period from April 2013 and the number of net additional dwellings that can be provided on deliverable sites over the next five years. A calculation is then made of the number of years' supply of housing land available in Shropshire. The table illustrates that at April 2013 there is **4.95 years'** supply of deliverable housing land for Shropshire.

**Table 4: Five Supply of Housing Land for Shropshire at 1<sup>st</sup> April 2013**

A	Total Deliverable Housing Land Supply - see table 3	9710
B	Five Year Housing Requirement (2013-2018) - see table 2	9,804
C	Surplus/Deficit in requirement (A - B)	-94 (99%)
D	Number of Years' Supply	4.95 years

## 5.0 Shrewsbury Housing Supply

- 2.1 Shropshire's housing land supply *includes* supply of land in the town of Shrewsbury, as the Core Strategy housing target of 27,500 dwellings includes the target for Shrewsbury. However, there is also a specific housing target for Shrewsbury of 6,500 dwellings to be provided between 2006 and 2026. This is set out in Policy CS2 of the Core Strategy.
- 2.2 Policy CS2 states that sites will be identified for phased release in the SAMDev DPD, so there are not yet equivalent phasing time bands for Shrewsbury to those shown in the Core Strategy for Shropshire in Policy CS10. Until the SAMDev Plan is further advanced, a pro-rata approach has been taken with Shrewsbury's share (6,500 dwellings) of the Core Strategy housing requirement of 27,500 dwellings being 23.6%.
- 2.3 Shrewsbury's housing delivery was always expected to be proportionately higher beyond 2015/16, due to the Core Strategy housing requirement being higher than recent rates of growth in Shrewsbury and the need to bring forward additional greenfield sites, including sustainable urban extensions and sites allocated through the SAMDev Plan, to accommodate this.

**Table 5: Shrewsbury Housing Completions 2006/07 to 2012/13**

<b>Shrewsbury</b>				
	<b>Net Completions</b>	<b>Housing requirement applying Core Strategy Policy CS10 pro-rata</b>	<b>Over provision/ shortfall</b>	<b>Cumulative provision/ Shortfall 2006 to date</b>
2006-2007	197	281	-84	-84
2007-2008	173	281	-108	-192
2008-2009	254	281	-27	-219
2009-2010	270	281	-11	-230
2010-2011	252	281	-29	-259
2011-2012	181	328	-147	-406
2012-2013	245	328	-83	-489

- 2.4 Using this pro-rata approach, Shrewsbury has not achieved its share of the CS10 housing release in any of the 7 years of the plan period so far (2006-2013) and therefore a 20% buffer is to be added to the housing requirement to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land.

- 2.5 Over the next five years (2013-2018) Shrewsbury's share of the CS10 phasing time bands shows a requirement for 328 dwellings per annum giving a total of 1,640 dwellings to be provided. A 20% buffer adds an additional 328 dwellings. There is also a need to provide for the delivery shortfall of 489 dwellings over the seven years of the Core Strategy plan period since 2006, in order that the target can be met, giving a total of 2,457 dwellings to be delivered over the next five years<sup>3</sup>.

- 2.8 The sites which make up these various components are included in schedules which are appended to this statement.

#### *Housing Land Supply in Shrewsbury*

- 2.9 Table 8 brings together the information in Tables 6 and 7, setting out the housing requirement for the 5 year period from April 2013 and the number of net additional dwellings that can be provided on deliverable sites over the next five years. A calculation is then made of the number of years' supply of housing land available in Shrewsbury. The table

<sup>3</sup> Note: If national guidance is provided on the methodology these figures will be amended as required.

illustrates that at April 2013 there is **5.28 years'** supply of deliverable housing land for Shrewsbury.

## Schedule H: Build Rate

The build rate was calculated using the methodology below, using data shown in table H1 from the Shropshire Planning Land Use Monitoring System (PLUMS) for building completions for sites over 40 dwellings over the years 2010-2012.

Build Rate Per Site = Total Number of Houses Built/no. years of active building throughout the year (ie. excluding years shown in purple where development was either just starting or just finishing off and development occurred during only part of the year)

Average Build Rate for the area (north, central, south) = Total Average Build Rate Per Site/No. Of Sites

Table H1 has been split into three to reflect differences in the housing markets in the various parts of the county. The table reflects the average build rate in the North, Central and South of Shropshire.

### Average Build Rate 2011-2013:

**North: 21 dwellings/annum average build rate**  
**Central: 38 dwellings/annum average build rate**  
**South: 36 dwellings/annum average build rate**

**Table H1**

 = Figures for that year excluded as likely to either have just started or just finished development.

In addition to the data gathered from the PLUMS, the feedback gained from the SHLAA 2013 developer questionnaire shows the anticipated delivery rate for larger sites (40+ dwellings) in next five year period. The information was gathered after a call to landowners, develops and agents on anticipated delivery of housing sites as part of the Strategic Housing Land Availability Assessment (SHLAA).

Due to the small sample size these projections are considered less reliable than the recent build rates shown in table H1, but nevertheless confirm the differences across the county, with higher rates of delivery expected in central and southern Shropshire, and lower rates in northern Shropshire. Delivery rates are expected to increase in future years in central and southern Shropshire.

**Table H2 Anticipated future build rates from SHLAA survey**
